

NDR Monitor

The most comprehensive and accurate, real-time deceased identity fraud solution

What is NDR Monitor?

NDR Monitor is a new and revolutionary deceased identity fraud solution that protects businesses against fraudulent applications for products, services, ID and credit.

Why is NDR Monitor unique?

It's accurate & reliable

Data is sourced directly from probate professionals via a brand-new software service that saves them time and money. The data is highly accurate and contains key variables including death certificate number, date of birth and previous known addresses.

It's fast

Records are added to NDR Monitor within 10 - 14 days after death, updated on a daily basis.

It's easy to integrate

Access to NDR Monitor is via our API, it's simple to use and requires minimal technical integration.

What data does NDR Monitor capture?

NDR Monitor contains the following information:

- Title
- Forenames (up to 4)
- Surname
- Previous surname (maiden name)
- Last known address
- Up to 4 other previous addresses (if differs from home address e.g. care home etc.)

- Death certificate number (pdf copy available for an additional fee if required)
- Date of birth
- Date of death
- Deceased had a will (Y/N)
- Grant of probate (Y/N)

The benefits
